

INDO 401

BIODEGRADABLE NATURAL SOLVENT EQUIPMENT DEGREASER

Indo 401 is a blend of natural solvents and detergents designed to remove tough soils including carbons, greases and oils. It was designed to replace the standard petroleum distillates, chlorinated hydrocarbons and glycol ether type cleaners which work well but present a disposal problem.

Heavy equipment, automotive engines, machinery and production equipment will clean quickly and easily with Indo 401. Road tars, greases, carbon and specialty lubricants are typical soils which are readily removed by Indo 401.

EMULSIFIABLE LIQUID - May be used straight or extended with water for increased economy. Unlike petroleum solvents like kerosene or mineral spirits, surfaces cleaned with Indo 401 may be rinsed free with a water flush.

SAFER - Indo 401 uses no petroleum distillates, chlorinated hydrocarbons, phenolics or glycol ethers which present waste disposal problems. Most waste treatment plants are able to accept Indo 401 dilutions for treatment (check with local authorities first).

WORKS COLD - No need to add heat as with water-based cleaners. Indo 401 works at full efficiency when cold thus lowering energy requirements and costs.

PLEASANT ODOUR - Most heavy duty solvent cleaners contain cresylic acid, chlorinated solvents or other odourous and toxic additives. Indo 401 cleans in heavy duty fashion and leaves behind a "citrus-like" odour. Indo 401 also has a slower evaporation rate than chlorinated-type solvents meaning lower volatile organic content in the air and thus a safer workplace environment.

NON-CORROSIVE - When used as directed, Indo 401 will not harm most metals and painted surfaces. Certain aluminum alloys and paints may be affected and surfaces should always be checked for safety before use.

INDO 401

DATA SERVICES INDO 401

USE APPLICATIONS: Efficiently and effectively cleans metal assemblies, engines, frames, machine parts, carburetors, production equipment, etc. Effective in garages, auto repair shops, railroads, petroleum industry, ink presses and for general plant maintenance. Excellent for removal of tar, grease, oil and soot, from road vehicles.

USE: May be used straight or diluted with up to 5 parts water depending on soil severity. Apply by low pressure spray, brush on, wipe on or immersion followed by a water rinse if desired.

Always scrape or knock off heavy accumulated deposits of tar, grease, asphalt, etc. in order to reduce solvent requirement.

FORM: Liquid

COLOUR: Colourless/Straw Yellow

% NON VOLATILE: 5.1

% ACTIVE: 100

SOLVENTS: Terpene derivative

DETERGENTS: Non-Ionic

FLASH POINT: 50°C

SPECIFIC GRAVITY: 0.986

BIODEGRADABILITY: Excellent

SURFACE SAFETY: Safe on most metal and painted surfaces. Always check surface effect first particularly at high strength solutions.

CAUTION: Read label and Material Safety Data Sheet completely before using this product.
