

# INDO 585

## BRUSHLESS VEHICLE WASH CONCENTRATE

### DESCRIPTION

INDO 585 is a powdered alkaline detergent concentrate chemically formulated to remove road film, carbon exhaust deposits and bug residue from painted vehicle surfaces utilizing pressure spray equipment and without the need to agitate the surface with brushes. It works equally well in hot or cold, soft or hard water and contains no caustic or solvents.

Due to the wide variance of water conditions, it is difficult to formulate a single product that will perform equally well in all applications. Indo 585 contains a synergistic blend of alkaline builders and detergents which dilute with water to produce a versatile cleaning solution. Tough road film deposits are removed without the use of caustic or solvents.

Indo 585 exhibits exceptional rinsing and leaves the vehicle surface spotless. In addition to being an excellent "brushless" detergent through pressure wash equipment, Indo 585 works equally well as a brush wash through automatic or manual wash equipment.

When used through pressure wash equipment, it is recommended to work with units that can produce a minimum of 800 lbs pressure for the rinse cycle. Best cleaning will be obtained when detergent and rinse are both applied at high pressures however, low pressure detergent application followed by adequate penetration time and a high pressure rinse will normally produce excellent results. When hot water is used, it should be possible to reduce the concentration of the cleaner to one half or one third of the level required with cold water. A special additive in Indo 585 leaves a shiny, beaded "show room" finished appearance on the vehicle surface after rinsing.

### INDO 585 offers the following advantages:

**CONCENTRATED POWDER** — contains no fillers. Product is 100% active

**RAPID DISSOLVING** — no insoluble residue or lumps to plug equipment

**CHELATED** — produces good cleaning and rinsing even under hard water conditions

**NON-CAUSTIC** — effective cleaning without the use of caustic ingredients which can produce permanent and damaging effects on paint or skin

**FREE RINSING** — detergent residue is rapidly and freely rinsed away even when only a minimum clear water rinse is available.

## INDO 585 DATA SERVICES

**USE:** Predilute with 9 parts warm (not hot) water to produce an effective "brushless" road film remover liquid concentrate for use with pressure wash equipment.

**COLD WATER CLEANING:** Dilute liquid concentrate 20 to 1 (5%) with water at nozzle

**HOT WATER CLEANING:** Dilute liquid concentrate 50 to 1 (2%) with water at nozzle

**PROCEDURE:** Apply in pressure mode if possible. Allow to remain on vehicle surface for 3-5 minutes to provide adequate penetration of "road film". Do not allow to dry on surface prior to rinsing or streaking may occur. Always apply detergent from bottom up and rinse from top down.

**FORM:** Free flowing powder

**COLOUR:** White

**ACTIVE INGREDIENTS:** 100%

**BULK DENSITY:** 0.96 gm/cc

**pH AS USED:** Approx 11

**WATER SOLUBILITY:** Excellent

**FOAM LEVEL:** Excellent

**RINSING:** Excellent

**CAUTION:** Although Indo 585 is a powder and contains no caustic, it should be handled with care and respect. Follow all label directions completely and carefully and read Material Safety Data Sheet (MSDS) before use.
