

# INDO 701

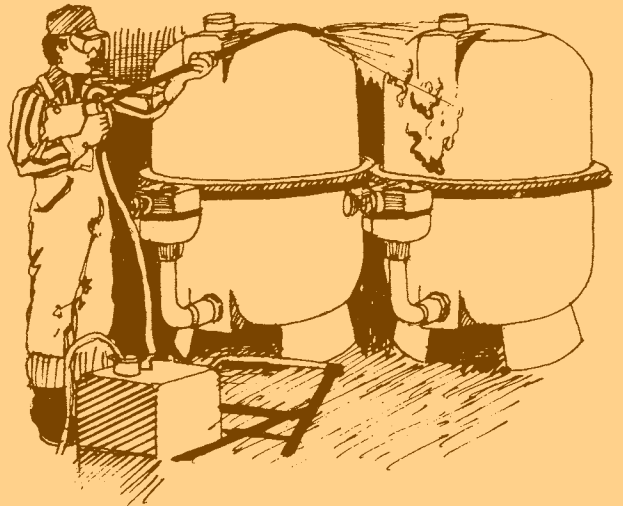

## INDUSTRIAL DETERGENT CONCENTRATE

### DESCRIPTION

Indo 701 is an industrial grade versatile detergent cleaner. It contains no glycol ether solvents and is non-caustic thus making it safe to use on most hard surfaces. The unique emulsion characteristics of Indo 701 allow it to work in areas normally requiring a caustic based or butyl based cleaner.

Specially designed to be used in food plants and food processing areas of all types, Indo 701 is equally at home in an industrial plant, steam cleaner or in vehicle washing.

Controlled foam characteristics make Indo 701 an excellent product to use through a foam gun applicator for cleaning vertical or inclined surfaces. The quick penetrating and emulsifying action breaks up oily and greasy soils almost like magic. Once emulsified the soil particles are suspended so as not to re-deposit. This allows for a 100% film and soil free surface after rinsing.

Indo 701 offers the following advantages:

- Concentrated Liquid – contains double the active ingredients of many other industrial cleaners. This provides a very economical use-dilution.
- Non-caustic – contains no caustic and is therefore safe on aluminum and other non-ferrous metals. Safer for employees to handle too!
- Non-butyl – Many cleaners depend on butyl solvent to obtain cleaning action. Butyl is very odourous especially when used at high temperatures. It is also becoming an increasing concern to regulatory and industrial personnel for safety reasons.
- Soap Free – May be used with any water source – soft or hard. Will not clog coils in steam cleaning or hot water pressure washers.
- Built-in Corrosion Inhibitors – contains ingredients to give corrosive protection to metallic parts being cleaned as well as internal parts of pressure washer or product handling equipment.
- Versatile – May be used in hot tank as a soak cleaner, steam cleaner, pressure wash, automatic floor scrubber or in normal cleaning.

## INDO 701 DATA SERVICES

**USE APPLICATIONS:** Since Indo 701 is caustic and butyl free, it may be considered a true general purpose cleaner. It is safe to use on most hard surfaces not normally harmed by water. Excellent for cleanup in food plants, meat processing operations, fisheries, canneries, etc. May be used in steam cleaning, pressure washers, automatic floor scrubbers and car washes. Great for manual cleaning jobs like vehicle wash, wall cleaning, and general plant maintenance.

### USE:

**STEAM CLEANING:** Light to medium soil – 1 to 2 parts per 100 parts water  
Heavy soil – 2 to 4 parts per 100 parts water

**GENERAL PURPOSE AND FLOOR CLEANING:** Light to medium soil – 2 to 4 parts per 100 parts water  
Heavy soil – 8 to 10 parts per 100 parts water

**FORM:** Liquid

**COLOUR:** Mauve

**ODOUR:** Mild, no perfume added

**% NON VOLATILE:** 18

**pH AS SUPPLIED:** 11.5

**pH 1% SOLUTION:** 9.8

**GLYCOL ETHERS:** None

**FLASH POINT:** None

**WATER SOLUBILITY:** Infinite

**SHELF LIFE:** 1 year minimum

**SURFACTANT SYSTEM:** Blended, mildly cationic

**CAUTION:** Although Indo 701 is only mildly alkaline, exercise care in handling. Read the material safety data sheet thoroughly before using this or any chemical product.
