

# INDO 710

## INDO 710 DATA SERVICES

**USE:** Dilute with water to produce a rapid and effective detergent for heavy equipment cleaning.

**COLD WATER CLEANING:** Dilute to 3-5% at nozzle with water

**HOT WATER CLEANING:** Dilute to 1-2% at nozzle with water

**PROCEDURE:** Apply to surfaces to be cleaned using pressure washer and working from bottom to top of equipment. Rinse surface with high pressure clear water working from top of equipment down.

**FORM:** Liquid

**COLOUR:** Colourless to straw yellow

**ODOUR:** Mild (Strong caustic vapours if used with hot water in closed area)

**% NON-VOLATILE:** 13

**pH AS SUPPLIED:** 13.4

**pH AS USED:** 11-12

**SPECIFIC GRAVITY:** 1.08

**SOLVENTS:** None

**WATER SOLUBILITY:** Excellent

**CAUTION:** This product is highly alkaline and should be treated with respect and care. It can cause serious burns to eyes and skin. Follow all label directions completely and carefully and read Material Safety Data Sheet (MSDS) before use.

## HEAVY DUTY ALKALINE CLEANER DEGREASER

### DESCRIPTION

INDO 710 is a high alkali liquid detergent designed for pressure wash applications in cleaning of heavy equipment and ferrous (iron) metal surfaces. It contains a synergistic balance of alkaline builders and wetting agents to optimize penetration of tough oily and greasy soils and leave a clean free rinsed surface.

Although many alkaline cleaners will do an adequate job on light and medium duty cleaning, they fail to meet the grade in heavy duty cleaning situations. Indo 710 was designed with such heavy duty cleaning in mind. Applications such as engine cleaning, heavy equipment and hydraulic cleaning and all cleaning where difficult soil exists on ferrous metal surfaces. Indo 710 takes advantage of years of research by the Canadian Sanitation Group into the

best balance of chemical components to give maximum cleaning at lowest cost. A special blend of wetting agents produces superior cleaning from pressure washer units where mechanical action or brushing would have previously been required. In addition, special additives produce much better rinsing than is normally possible with high caustic systems.

Indo 710 works well in cold or hot water applications however hot water will normally produce superior results particularly where grease is present. When hot water cleaning is used, it is possible to reduce the concentration substantially from cold water cleaning dilutions.

### INDO 710 offers the following advantages:

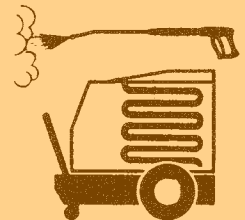

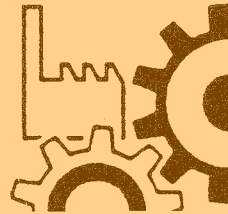

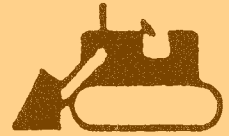

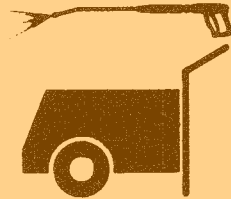

**CONCENTRATED LIQUID** — simple and quick to mix and economical to use. No undissolved powder or lumps to settle out in mixing tanks or plug up in spraying equipment. May be metered easily into any system.

**SOAP FREE** — may be used with any water source — soft or hard

**CHELATED** — added sequestering agents produce enhanced cleaning and rinsing

**SUPERIOR WETTING** — rapid penetration and dispersion of soils produces cleaner surfaces in less time

**STABLE** — even though highly concentrated, no separation or settling takes place. May be stored for 1 year or more.
